Experience

Zelthy

Jan 2026 – Present

Software Engineer - I (Backend)

Bengaluru, India

- Contributing to core backend systems using Python (**Zango framework**) for a multi-tenant SaaS platform
- Shipped incremental backend features across **core modules**, ensuring stable and reliable production behavior

FrontPage (YC S21)

Aug 2025 – Jan 2026

Software Engineer

Bengaluru, India

- Architected and built the core backend platform for an AI-driven equity research product using **Node.js**, **TypeScript**, **PostgreSQL** and **Redis**, serving concalls, company financial data, and AI-generated insights.
- Designed and built a **Prefect**-orchestrated concall processing pipeline ingesting PDFs from GCS, performing **Gemini OCR** transcription, **LLM summarization**, insight extraction, and **semantic embedding indexing** for document linking at scale. [\[Link\]](#)
- Built a semantic **news de-duplication system** using **GPT-generated embeddings** to cluster and collapse redundant articles across sources, dramatically improving signal-to-noise in the news feed.
- Developed an automated pipeline to extract management team data (**CEO, CFO, Directors**) from annual reports and enrich executive profiles via **web search** for user-facing company pages. [\[Link\]](#)

FrontPage (YC S21)

Feb 2025 – Jul 2025

Software Engineer Intern

Bengaluru, India

- Revamped the entire community-facing website, including architecture and UI/UX, and developed a new **Private Clubs** system supporting exclusive, invite-only investment groups.

Technical Skills

Languages: C++, Javascript, Typescript, Python

Web Technologies:: HTML, CSS, Node.js, Express.js, React.js, TailwindCSS, Redux

Database Technologies: MySQL, PostgreSQL, MongoDB, Firebase Storage

Others : Docker, Prefect, Redis, Kubernetes, Jest

Projects

BuildStack | [React.js](#), [TypeScript](#), [PostgreSQL](#), [Redis](#), [Docker](#), [RabbitMQ](#) GCP | [Github](#)

- Developed a scalable microservices platform using **TypeScript**, **Node.js**, and **Docker**, deployed on **Google Cloud Platform** with **99.9%** uptime and **PostgreSQL** (Supabase) database integration through **Prisma ORM**.
- Implemented caching using **Redis** resulting in faster response times and used **MongoDB** for event logging.

Buildr | [React.js](#), [Node.js](#), [Express.js](#), [Firebase](#), [TailwindCSS](#), [MUI](#) | [Github](#)

- A portfolio platform for developers using **ReactJS**, **Firebase Storage**, **Firestore (NoSQL DB)**, and **Cloud Functions** to create, showcase, and manage professional portfolios with lifetime hosting and no restrictions for **200+** users

WorkWay | [Tailwind](#), [Node.js](#), [Express.js](#), [Cloud Firestore](#) | [Github](#) | [Live](#)

- Leveraged the Greenhouse Jobs API using JavaScript and Node.js to automatically retrieve and compile a comprehensive list of **24,000+** job listings attracting **500+** users from **40+** countries.

Education

Heritage Institute of Technology

2021 - 2025

B.Tech in Computer Science Engineering (CGPA: 8.05)

Kolkata, India

Achievements

- Attained a rating of **1413 (Specialist)** on Codeforces ([Profile](#)) through **50+** contests and solved **1000+** problems
- Achieved a rating of **1837** on Leetcode ([Profile](#)), among the top **8%** of total users.
